1. INTRODUCTION

1.1 Overview of Study Data

The primary objectives of the National Incidence Study were to obtain a more complete picture of the extent and character of recognized child abuse and neglect than is achievable from official report statistics alone and to examine how and how well the official reporting system is working. In each study county, data were collected from two broad categories of respondents, Child Protective Services agencies (the primary agency legally responsible for investigating reports of suspected child abuse and neglect) and other (non-CPS) agencies. Information was collected from 26 CPS agencies and 529 non-CPS agencies.

There was an average of 20 non-CPS agencies per county and they were of two general types. The first type were other official agencies which may have statutory authority for investigation or treatment of situations involving child abuse or neglect; these included juvenile probation, police and sheriff's departments, county coroners and county public health departments. The second type were other major institutions and agencies whose staff may encounter abused or neglected children; these included public schools, hospitals, mental health facilities and other social service agencies.

The study was conducted in a national probability sample of 26 counties clustered within 10 states. The sample contained a mix of urban, suburban and rural areas. Eight of the sampled counties had populations of over 200,000; another eight were located in urban areas but had populations under 200,000; and the remaining ten counties were located in rural areas containing no cities of 50,000 or more population.

Three questionnaires were used in this study, a CPS Long Form, CPS Short Form and a non-CPS Professional Form. In some (smaller) counties, all reports to CPS were to be described using the Long Form. In others, the Long Form was used for all reports involving fatalities or alleged sexual abuse and for a random sample of all other reports. In these latter counties, the Short Form was used for all reports not requiring a Long Form. Both the CPS Long Form and Short Form yielded information on each child in the family, with the Long Form containing detailed demographic information and information on the nature and extent of the alleged abuse or neglect, and the Short Form containing only enough information to identify duplicate children in the data base. The Professional Form contained information on only one child in the family but was similar to the Long Form in that it yielded detailed demographic information and information on the nature and extent of the suspected maltreatment. For purposes of statistical analysis, only the Long Form and Professional Form were included in the analysis file and, therefore, all documentation in this manual pertains to information collected from these two forms.

1.2 Overview of Report

This report describes the analysis file which was used to produce the substantive findings presented in the National Incidence Study final report (Recognition and Reporting of Child Abuse and Neglect) and which is available to other researchers as a Public Use Data Tape. This report very briefly summarizes the steps involved in the creation of the analysis file. Additional information necessary for a full understanding of the data is a companion report, entitled Methodology Report.

2. DATA COLLECTION

2.1 CPS Data Collection

Data forms were completed by CPS caseworkers, together with study representatives (CPS Coordinators) assigned to assist the local CPS offices. As reports were received by the local CPS office, they were logged in on a study report log. This log kept a record of the status of reports as they were received and identified all reports that needed Long Forms. CPS data were collected between May 1, 1979 and April 30, 1980. From a total of 17,900 reports to CPS agencies in the study counties, 5572 Long Forms and 12,328 Short Forms were received.

2.2 Non-CPS Data Collection

The data collection for non-CPS agencies occurred over a specific four-month period that varied for 3 different groups of counties. Generally, one county in a given state had the period September-December, another had October-January, and the third had November-February. Professional staff from agencies in the study design completed data forms, either by filling out the Professional Form themselves or by calling in the information over a toll-free WATS line number. In the latter instance, the Professional Form was filled out by a telephone interviewer, from information provided by the respondent. A total of 3,120 non-CPS cases were received over a period of six months.*

*Cases were sampled in two non-CPS agencies. The number 3,120 includes children listed for sampling in these two agencies. The number of actual data forms was 3,009.

Survey Instruments

Following are reproductions of the Long Form and Professional Form used to gather information for this study. As these forms were processed, variables such as study report number, county number, followup status and sampling status were added. Transcription sheets were used to code certain child and maltreatment information and to record the results of definition-related evaluative assessment. These transcription sheets are presented following the data forms.

ITEM R. ANSWER CODES

Physical Assault with Bodily Injury

1. Assault with implement (knife, strap, cigarette, etc.)
2. Assault without implement (hit with fist, bit, etc. or means of assault unknown)

Sexual Exploitation

3. Intrusion (acts involving penile penetration - oral, anal or genital; e.g., rape, incest)
4. Molestation with genital contact
5. Other or unknown

Other Abusive Treatment

6. Verbal or emotional assault (threatening, belittling, etc.)
7. Close confinement (trapping, locking in closet, etc.)
8. Other or unknown (e.g., attempted physical or sexual assault)

Refusal of Custody

9. Abandonment
10. Other (expulsion, refusal to accept custody of runaway, etc.)

Inattention to Remedial Health Care Needs

11. Refused to allow or provide needed care for diagnosed condition or impairment
12. Underreated delay or failure to seek needed care

Inattention to Physical Needs

13. Inadequate supervision
14. Disregard of avoidable hazards in home (exposed wiring, broken glass, etc.)
15. Inadequate nutrition, clothing or hygiene
16. Other (e.g., reckless disregard of child's safety; driving while intoxicated, etc.)

Inattention to Educational Needs

17. Knowingly "permitted" chronic truancy
18. Other (repeatedly kept child home, failed to enroll, etc.)

Inattention to Emotional/Developmental Needs

19. Inadequate nurturance/affection (e.g., failure-to-thrive)
20. Knowingly "permitted" maladaptive behavior (delinquency, various drug/alcohol abuse, etc.)

Other

22. Voluntary neglect (due to hospitalization, incarceration, etc.)
23. General neglect (more than two of codes 13-16; use only for endangerment)
24. Maltreatment other than above

(B) SEVERITY OF MALTREATMENT-CAUSED HARM/ENDANGERMENT (use lower code number that applies)

1. Fatal: maltreatment suspected as a major contributory cause of death
2. Life-threatening Injury/Condition: required emergency care aimed at preserving child's life
3. Serious Injury/Condition: professional treatment/remediation required to alleviate acute present suffering or to prevent significant long-term impairment
4. Moderate Injury/Condition: behavior problem or physical/mental/emotional condition with observable symptoms lasting at least 48 hours
5. Probable Impairment: no obvious injuries or problems but, in view of the extreme or traumatic nature of the maltreatment, it is probable that the child's mental or emotional health or capabilities have been significantly impaired
6. Endangered: child's health or safety was or is seriously endangered, but child appears not to have been harmed thus far
7. Other/Unknown

(C) NATURE OF HARM/ENDANGERMENT DESCRIBED IN R

1. Physical injury
2. Other health condition or physical impairment
3. Impaired educational development (includes chronic truancy)
4. Mental-emotional injury or impairment or behavior problem (except chronic truancy)
5. Unknown or not applicable; use only if (B) = 5, 6 or 7

(D) ASSESSMENT OF LIKELIHOOD THAT THIS CHILD WAS ACTUALLY HARMED DURING THE STUDY PERIOD AS A RESULT OF THIS FORM OF MALTREATMENT (AS CODED IN R). BASE ANSWER ON STUDY DEFINITIONS.

1. Certain
2. Very Probable (above 80 percent probability)
3. Probable (51 - 80 percent probability; more likely than not)
4. Doubtful (50 percent or less probability)
5. Very Doubtful (situation appears not to meet study definitions)

FOR ASSISTANCE IN COMPLETING THE FORM OR TO PROVIDE DATA ANONYMOUSLY BY TELEPHONE, CALL TOLL-FREE (800)-638-6626, 9 A.M. TO 6 P.M.
 PREVAILING EASTERN TIME, MONDAY-FRIDAY OR NOON TO 5 P.M. ON SATURDAYS.

IMPORTANT: Information provided on this form is confidential and will be used for research purposes only. Use of this form does not constitute an official report of suspected child abuse or neglect as may be required by law under state law. In the study, guidelines below are not intended to indicate circumstances where an official report would - or would not - be required.

GUIDELINES FOR USE OF DATA FORM

GENERAL INSTRUCTIONS

Please provide the information requested on this form - either by completing the form itself or by calling Westat's toll-free number (above) and giving the information to a study staff member - for any child under 18 living in a study county whom you suspect to have been "maltreated" as defined below. Note that, although data collection begins October 1, 1979, the study encompasses maltreatment situations occurring at any time between September 1, 1979 and December 31, 1979. Information must be received by January 10, 1980 to be included in the study findings.

SITUATIONS ENCOMPASSED BY STUDY

The three major aspects of the study definitions are as follows:

1. **Persons responsible for maltreatment:** Child maltreated by a "parent substitute" or "other adult caretaker," or a "parent substitute" "permitted" maltreatment by other persons. Key terms (in quotation) are defined at bottom of page 2.
2. **Maltreatment events:** Through purposive acts or marked inattention to child's needs, behavior of a parent/substitute or other adult caretaker caused foreseeable and avoidable injury or impairment to a child or materially contributed to unreasonable prolongation or worsening of an existing injury or impairment. Any of the following occurrences during the study period would meet this definition.
 - **Physical assault** (including excessive corporal punishment, resulting in bodily injury with observable symptoms lasting at least 48 hours (slight bruising or reddening of skin consistent with mild corporal punishment is excluded);
 - **Sexual exploitation:** acts such as sexual intercourse (forcible or consensual), deviate intercourse, molestation with genital contact or promoting of prostitution (study assumes probable emotional injury);
 - **Close confinement:** binding of arms or legs, locking in closet, etc. (study assumes probable emotional injury);
 - **Any other pattern of assaultive, exploitative or abusive treatment:** such as threatened or attempted physical or sexual assault, extreme verbal abuse or other overtly hostile or punitive treatment if believed to have caused significant physical, mental or emotional injury or impairment serious enough to persist at least 48 hours (transitory emotional upset is excluded);
 - **Complete abandonment or other refusal to maintain custody:** disclusion from home, refusal to accept custody of a runaway, etc. (study assumes probable emotional injury);
 - **Encouragement or "permitting" of chronic maladaptive behavior:** truancy (at least five days per month on an average), delinquency, prostitution, serious drug/alcohol abuse, etc.;
 - **Refusal to allow needed treatment** for a professionally diagnosed physical, educational, emotional or behavioral problem, or failure to obtain or provide treatment in accord with professional recommendation, if physically and financially sole to do so and if the refusal or failure has resulted in significant prolongation or worsening of the condition;

BEFORE COMPLETING THIS FORM, PLEASE PROVIDE THE INFORMATION REQUESTED BELOW SO WE CAN REACH YOU IN CASE ANY CLARIFICATION IS NEEDED (does not apply if data provided by telephone). This section will be deleted and destroyed within 10 days of receipt at Westat.

BOX 5 -- SEVERITY OF INJURY OR IMPAIRMENT (FOR USE IN ITEM 14; ENTER LOWEST NUMBER THAT APPLIES)

1. Fatal injury or condition: Maltreatment suspected as major contributory cause of child's death.
2. Life threatening injury or condition: Required emergency care aimed at preserving child's life.
3. Serious injury or condition: Professional treatment needed to relieve acute present suffering or prevent significant long-term impairment.
4. Moderate injury or condition: Behavior problem or physical, mental or emotional injury or impairment with observable symptoms lasting at least 48 hours.
5. Probable impairment: No obvious injuries or problems but, in view of the extreme or traumatic nature of the maltreatment, it is probable that the child's mental, emotional or physical health or capabilities have been significantly impaired.
6. Other (Please explain in item 10)

DEFINITION OF KEY TERMS

Parent(s)/Substitute(s): the parents, stepparents, foster parents or other legal guardians with whom the child was living, or if not living with such persons, the adult(s) with primary responsibility for the child's care. If one parent/substitute does not have a spouse normally living in the household (e.g., separated, divorced, never married), the other is considered missing.

Other Adult Caretaker: Any adult 13 or older who lived at or regularly visited the child's home (grandparents, adult siblings, a mother's boyfriend, etc.) or was in some other way responsible for the child's care (an adult babysitter, a divorced parent not living with the child, etc.) and is involved in the suspected maltreatment - is suspected to have maltreated the child.

Permitted: Knowingly allowed without attempting to intervene - was present during the maltreatment and did not attempt to stop it or had reason to know about the problem or danger (e.g., having been informed of previous incidents) but did not attempt to protect the child or prevent recurrences.

"Elementary" School: Contains none of grades 9-12; "Secondary" School: Contains any of grades 9-12.

NOTE:

- REMEMBER TO PROVIDE INFORMATION REQUESTED ON PREVIOUS PAGE (QUESTIONS 1-9)
- USE ITEM 32 OR A SEPARATE SHEET OF PAPER IF YOU NEED MORE SPACE FOR YOUR ANSWERS.

10. INDICATIONS OF INJURY/IMPAIRMENT: Describe any injuries, health conditions, physical impairments, emotional problems, or school or behavior problems you suspect to have been caused or worsened by maltreatment. Be specific (e.g., child often absent during last 2 months - missed 13 of last 30 school days). Indicate approximate dates of key events. If you are not aware of any particular symptoms or problems, so indicate.

11. SUSPECTED MALTREATMENT BEHAVIOR: Describe the suspected maltreatment acts or omissions of the child's parent(s), substitute(s) or other adult caretakers. Include any available information about the precipitating events and about the seriousness of the problem (e.g., frequency, duration, prior incidents). Refer to individuals by relationship to child (e.g., mother, grandfather), not by name.

12. BASIS FOR SUSPICION: Describe how this situation came to your attention; indicate the information or reasoning which leads you to suspect that the above-described behavior by the suspected adult has actually occurred and (if applicable) caused or contributed to child's injuries or problems.

Indicate in Item 13 the form(s) of maltreatment you suspect the child to have experienced during the study period and then answer 14-18 (for each form, if more than one applies). If you suspect more than one form of maltreatment, begin in the leftmost column with the one about which you are most certain.

3. DATA FILE PREPARATION

As data forms were received at Westat, they were manually edited, coded, and separated by form type. The forms were then grouped into batches and keypunched. Data files were then created for each form type, and using standard computer programs, range and consistency checks were performed for all variables. Errors detected through this "machine edit" were corrected on the appropriate data files.

Information coded from the three data forms encompassed:

- Information about the report (date of report, allegation, etc.) and the family (location of household, number of children in home, number of alleged victims, etc.);
- Information about the individual child (name, age, etc.); and
- Information about the suspected maltreatment experienced by the individual child, as perceived/described by the respondent and as classified and coded by Westat.

The Professional Form record contained all three kinds of information for the child described in the data form. The Short Form data form file contained report/family information plus child information for each alleged victim in the home. (The data form requested such information for all children in the home, but only alleged victims were coded individually.) The Long Form data file contained report/family information, plus child information for each alleged victim, plus maltreatment information for each "indicated" victim - each child substantiated by CPS (according to agency criteria) or believed by the investigating caseworker to meet the study's maltreatment criteria. Children in the home

who were not alleged or indicated as maltreatment victims were not coded at all, and maltreatment information was not coded for children who were alleged but not indicated as maltreatment victims.

After all data had been edited, the three data files (Short Form, Long Form, and Professional Form) were merged, and an unduplication file was created to identify duplicate children in the data base. Computer listings, sorted on several combinations of key variables, were then generated. Research assistants searched through these listings to identify duplicate records. Key information on each of these duplicates was coded and read into a temporary data file. This data file was then merged with the data files from the Professional Form and Long Form to produce the analysis file, from which the Public Use Tape was created.

4. CONTENTS AND ORGANIZATION OF THE DATA FILE

4.1 Overview and Index

The public use tape technical specifications are as follows:

- 9 track;
- 1600 BPI;
- Standard labeled;
- EBCDIC recording mode;
- ODD parity.

The data base is fixed block with a record length of 200 and a block size of 12,000 characters. The file is a child level data base with 12,347 records, 9,338 for children listed in CPS Long Forms and 3,009 for children identified in Professional Forms.

To create the analysis file, the Long Form and Professional Form were merged into one data file with a standard record format. The record layout for the analysis file is shown in the following Index. This Index provides a brief definition of each variable and, where applicable, item numbers or letters that reference where the variables were extracted from the original data forms.*

*The index does not include item reference numbers for all variables. Some variables in the analysis file are only applicable to one data form. Other variables were added to the data forms by Receipt Control, and some were recoded by combining information from several other variables.

The analysis file code manual is shown on the following pages. The code manual contains the variable names, their column locations, and definitions of the variables and categories. For recoded variables, the derivation and computation is indicated.

The variable FTYPE differentiates the Long Form (FTYPE=1) from the Professional Form (FTYPE=2). The record layout for both the Long Form and Professional Form are the same. Variables that are only applicable to one form type are indicated in the code manual as (LF only) or (PF only). Some variables that are on both form types have different data values. Where applicable, these differences are indicated in the code manual.

The weights used in computing national estimates are located in columns 174-197 and are described in Technical Report No. 1, Sample Design and Estimation Procedures.

| VARIABLE NAME | COLUMN NO. | DEFINITION |
|---------------|------------|------------|
|---------------|------------|------------|

The following series of variables (PHYA-N) represent summary classifications of different types of maltreatment. Their purpose is to summarize whether or not that general type of maltreatment was alleged and, if so, whether the maltreatment was countable. The following is an example of the algorithm used to create these variables.

Computation for PHYA:

```
If (TYPE1>0 & TYPE1<3) or (TYPE2>0 & TYPE2<3) or  

(TYPE 3>0 & TYPE 3<3) then DO;  

PHYA = 0;  

If (TYPE1>0 & TYPE1<3) + (COUNT1 = 1, 2 or 7)  

Then PHYA = 1;  

If (TYPE2>0 & TYPE2<3) & (COUNT2 = 1, 2 or 7)  

Then PHYA = 1;  

If (TYPE3>0 & TYPE3<3) & (COUNT3 = 1, 2 or 7)  

Then PHYA = 1.
```
