PREFACE

The data for *Adoption and Foster Care Analysis and Reporting System (AFCARS), 1998*, have been given to the National Data Archive on Child Abuse and Neglect for public distribution by the Children's Bureau. Funding for the project was provided by the Children's Bureau, Administration on Children, Youth and Families, Administration for Children and Families, U.S. Department of Health and Human Services.

ACKNOWLEDGEMENT OF SOURCE

Authors should acknowledge the National Data Archive on Child Abuse and Neglect and the original collector of the data when they publish manuscripts that use data provided by NDACAN. Users of these data are urged to follow some adaptation of the statement below.

The data used in this publication were made available by the National Data Archive on Child Abuse and Neglect, Cornell University, Ithaca, NY, and have been used with permission. Data from the *Adoption and Foster Care Analysis and Reporting System (AFCARS)* were originally collected by the Children's Bureau. Funding for the project was provided by the Children's Bureau, Administration on Children, Youth and Families, Administration for Children and Families, U.S. Department of Health and Human Services. The collector of the original data, the funder, NDACAN, Cornell University and their agents or employees bear no responsibility for the analyses or interpretations presented here.

PUBLICATION SUBMISSION REQUIREMENT

In accordance with the *Terms of Use Agreement* for these datasets, users of these data are required to deposit a copy of any published work or report based wholly or in part on these data with NDACAN. A copy of any completed manuscript, thesis abstract, or reprint should be sent to the National Data Archive on Child Abuse and Neglect, Cornell University, Family Life Development Center, MVR Hall, Ithaca, New York 14853-4401. Such copies will be used to provide funding agencies with essential information about the use of NDACAN resources and to facilitate the exchange of information about research activities among data users and contributors.

Purpose of the 1998 User's Guide Supplement

The *AFCARS User's Guide Annual Supplement, 1998* is intended for use with the *Adoption and Foster Care Analysis and Reporting System (AFCARS) User's Guide and Codebook*. The *User's Guide* contains a general overview of the AFCARS project and detailed descriptions of the variables contained in the adoption and foster care files. This *Supplement* contains information specific to the 1998 AFCARS datasets, *AD1998v5* and *FC1998v6*. There are six sections presented in the following order:

- a table indicating whether a state submitted data in the years 1995 through 1999
- a table of adoption and foster care record counts for the 1998 files
- counts of adoption and foster care variables by state in the 1998 files
- a listing of the geographic FIPS codes included in the 1998 v6 foster care dataset
- explanatory footnotes provided by the states
- additional data considerations, if any, conclude the document

History of State Adoption Submissions to AFCARS

By AFCARS regulation, states were required to submit AFCARS data beginning in 1995; it was not until 1998, however, that penalties established by the same regulation became applicable. Data submitted prior to 1998 were often partial and incomplete. The table below indicates the years in which individual states submitted adoption data. Please note that a black square in a cell below does not imply that a state's data file was complete; some state files contained very few records. The number of records in each state's files is contained in the *State Records Counts Table* for the year.

History of State Foster Care Submissions to AFCARS

By AFCARS regulation, states were required to submit AFCARS data beginning in 1995; it was not until 1998, however, that penalties established by the same regulation became applicable. After 1998 some states were excluded from the annual datasets either because they did not make the three required data submissions or the data were of insufficient quality to be usable. The table below indicates the years in which individual states submitted usable foster care data. Please note that a black square in a cell does not imply that a state’s data file was complete; some state files contained very few records. The number of records in each state’s files is contained in the *State Records Counts Table* for the year.

1998 Unduplicated Record Counts

States submit data to AFCARS twice a year; the first reporting period ends April 30 and the second September 30. Prior to each annual release, the Children's Bureau combines submissions for the two reporting periods and removes duplicate records. The table that follows lists the number of adoption and foster care records contained in the unduplicated annual 1998 adoption and foster care files by state.

1998 v5 Adoption Variable Counts By State

The first column in the following table contains the names of the variables in the adoption file. Please refer to the *AFCARS User's Guide and Codebook* for more information about specific variables. Subsequent columns contain the number of records with non-missing values for the variable in the state identified in the column heading. The first row, which appears in bold, indicates the maximum number of records for the state. Reviewing the table before attempting an AFCARS analysis can be useful. For example, looking down Florida's column, it is apparent that the state did not submit information about the mother's year of birth (DOBYRMOM) in 1998.

1998 v6 Foster Care Variable Counts By State

The first column in the following table contains the names of the variables in the foster care file. Please refer to the *AFCARS User's Guide and Codebook* for more information about specific variables. Subsequent columns contain the number of records with non-missing values for the variable in the state identified in the column heading. A complete set of a state's variables spans two pages. The first row in the set, which appears in bold, indicates the maximum number of records for the state. Reviewing the table before attempting an AFCARS analysis can be useful. For example, looking down New York's columns, it is apparent that the state did not submit CLINDIS, MR, VISHEAR, or PHYDIS, that is, disability information, in 1998.

FIPS Codes Used in the 1998 v6 Foster Care File

Below is a listing of the geographic Federal Information Processing Standard (FIPS) codes included in the 1998 v6 foster care dataset. The regions listed had 1,000 or more records in the annual database. For regions with fewer than 1,000 records the FIPS code is not provided, and a value of 8 (*Not provided for reasons of confidentiality*) is assigned.

1998 State Footnotes

States are encouraged, but not required, to provide explanatory footnotes with each of their two submissions per fiscal year. The footnotes allow states to provide additional information they consider necessary for proper interpretation of their data. The footnotes may include such information as:

- general characteristics of the state's adoption and foster care system
- characteristics of the population, including whether certain types of placements are included
- state definitions that differ from federal AFCARS definitions.

Footnotes for the 1998 versions of both the adoption and foster care data follow, sorted by state and element number. The submission period, either March (*03*) or September (*09*), is noted. General state footnotes that are not specific to an element or period are given an element number of *00*. The *A* or *F* preceding an element number identifies it as an adoption or foster care element, respectively.

**NDACAN strongly recommends that users review the 1998 footnotes
that follow before attempting to analyze the 1998 AFCARS data.**

| <i>South Carolina</i> | 03 | A00 | Adoption information is derived from two stand alone, PC-based data systems that are not connected or related to the state's mainframe foster care data system. The two components of the PC-based adoptions databases (one for tracking adoptions, another for tracking subsidies) are not ordinarily connected or related by a common identifier. The tracking and subsidy databases were linked using (primarily) children's first names, adoptive family names, and placement dates for the first time for the 1998-A AFCARS submission. This work was performed by a contractor who was engaged by SC-DSS' Division of Family Preservation & Child Welfare Services. Until the state's SACWIS system is ready, adoption data will be prepared by the contractor. |

| | 03 | A04 | The state only has information about children placed by SC-DSS. All values for this field are 1 = <i>Yes</i> . |
| | 03 | A07 | Mixed black and white race is noted in the state's files. For purposes of adoption, black heritage is the more important part, and anyone with this designation is coded as 2 = <i>Black</i> . |
| | 03 | A07 | Asian/Pacific Islander would be coded as <i>Other</i> in the state's adoption records. Those with an <i>Other</i> designation appear in AFCARS as 5, <i>Unable to determine</i> . |
| | 03 | A07 | <i>Hispanic</i> is a racial designation in the state's files. For AFCARS, these individuals are coded as 5 and Hispanic Origin = 1. |
| | 03 | A09 | Children at risk for later problems are considered to have special needs. At-risk traits include prematurity, sickle cell trait, learning disability, child drug use, child sexual activity, Down's syndrome, and being a victim of abuse. |
| | 03 | A09 | Race, by the state's definition of special needs, is considered an amplifying factor for age, sibling group size, and other problems. Race by itself is not considered a special need. |
| | 03 | A10 | For purposes of this element, multiple special needs were coded according to the highest ranking in the following scheme: Med.Condit/Ment/Phys/Emot Disab (highest), Age, Sibling Group, At-risk (lowest). Race by itself is not considered a special need. |
| | 03 | A10 | Children considered to have special needs due to risk factors were coded as 5 = <i>Other</i> if no higher ranked needs were present for a child. |
| | 03 | A15 | These conditions might include AIDS, respiratory illness, heart/blood problem, cancer, sickle cell anemia, or CNS disease. |

| | 09 | F00 | SACWIS was made operational on September 14, 1998; therefore the overwhelming majority of data contained in this AFCARS report is data converted from the foster care tracking and foster care licensing legacy systems. |
| | 09 | F00 | Interfaces were used to obtain data from the following systems: DSS Child Support System, DSS CHIP system, DSS Foster Home Payment System, DSS Medically Fragile PC System, DSS Managed Treatment Services PC System, DSS CIS System and the DSS SDX system. See footnotes 59, 60, 61, 62, 63, 64, and 66. |

| | | F41 | The foster care legacy system did not distinguish between foster home (relative): code = 2 and foster home (non relative): code = 3. Therefore, converted legacy system data was converted to foster home (non relative): code = 3 and reported as such. The legacy foster care licensing system did not capture the license number and other related caretaker data elements for an individual foster home operating under contract with licensed child placing agencies or licensed group home providers.
