StFCID

Variable Label: St and RecNumbr (for linking)

Definition:

The purpose of this variable is to aid in linking files by providing one consistently-named variable across datasets. The StFCID is the combination of the variables "St" (the state 2-character code) and "RecNumbr", the encrypted child's AFCARS identifier. This same variable can be found (or constructed) in the NYTD Outcomes File, the AFCARS Foster Care File, and the NCANDS Child File.

OutcmRpt

Variable Label: #34: Outcomes Reporting Status

Definition:

The outcomes reporting status represents the youth's participation, or lack thereof, in the outcomes data collection. If a youth is in the baseline or followup sample or population, but the State agency was unable to collect the information, the reason is indicated. The valid response options for this element are described below.

- Youth participated: The youth participated in the Outcomes Survey, either fully or partially.
- Youth declined: The State agency located the youth successfully and invited the youth's participation, but the youth declined to participate in the data collection.
- Parent declined: The State agency invited the youth's participation, but the youth's parent/guardian declined to grant permission. This response may be used only when the youth has not reached the age of majority in the State and State law or policy requires a parent/guardian's permission for the youth to participate in information collection activities.
- Incapacitated: The youth has a permanent or temporary mental or physical condition that prevents him or her from participating in the outcomes data collection.
- Incarcerated: The youth is unable to participate in the outcomes data collection because of his or her incarceration.
- Runaway/missing: A youth in foster care is known to have run away or be missing from his or her foster care placement.
- Unable to locate/invite: The State agency could not locate a youth who is not in foster care or otherwise invite such a youth's participation.
- Death: The youth died prior to his participation in the outcomes data collection.
- Not in sample: The 19-year-old youth participated in the outcomes data collection as a part of the baseline population at age 17, but the youth is not in the State's followup sample. This response option applies only

when the outcomes data collection is required on the followup population of 19-year-old youth.

- Blank: Allowed as a value only if the youth is not in the baseline population or if his/her birthday falls within 45 days of the end of the report period.
